

## **The Intention Behind The Free Estimator:**

**You Have To Understand A Problem –  
Before You Can Resolve It**

**These Estimators help shine a light on obscure financial problems.**

**Legislated Regulation has had the unintended consequence of  
putting many people out of reach of the Financial Planning Industry.  
This is due mainly to the high cost of new business acquisition.  
Financial Planners are forced to take the sensible business decision  
to prospect for new business based on higher net worth individuals.**

**However now this Free tool makes it possible to allow many more people to  
self examine - become aware of, and strengthen, their own positions.**

**Any donation at your discretion is welcome to assist us in keeping this tool Free of charge  
for the many who cannot afford a professional financial planner.**
